Natural Resources Conservation Service (NRCS) Jobs — Soil Conservation Technician — Jackson, MS, USA

Description

Readers considering Natural Resources Conservation Service (NRCS) jobs in Jackson, MS, USA can learn about the Soil Conservation Technician position and its place in land conservation. A regular workflow combines documenting soil and water field surveys with assisting with conservation practice records, with care needed to meet each deadline. People with experience in soil science and conservation can apply those strengths to this career area.

Responsibilities

- Document soil and water field surveys.
- Assist with conservation practice records.
- Document progress clearly and share outstanding questions with the right colleagues.
- Share work updates and close out records when each task is complete.

Qualifications

- Practical familiarity with soil science and conservation.
- Ability to organize information and communicate clearly with colleagues or service users.
- Attention to accuracy, deadlines, and established operating procedures.

Experience

A background in soil science, academic projects, or related service work provides useful preparation for soil conservation technician responsibilities.

Skills

soil science, conservation, field reporting, communication, organization, accuracy
