

Remote Internet Search Quality Rater – English (United States)

Description

Welo Data is hiring part-time Search Quality Raters to evaluate how useful and relevant search-engine results are for U.S. users. The fully remote project offers a flexible schedule and does not require specialized technical experience.

Responsibilities

- Review search results and judge usefulness and relevance.
- Answer structured quality questions and apply project guidelines consistently.
- Complete online rating tasks that contribute to search and AI quality improvement.
- Follow client conventions, confidentiality rules and quality requirements.

Qualifications

- Fluent English and strong familiarity with U.S. popular culture.
- Excellent online research skills and comfort working on the web.
- Reliable computer, internet connection and antivirus software.
- Must be at least 18 and pass required learning modules and quality testing.
- Cannot simultaneously participate in conflicting search/ads rating programs specified by the employer.

Experience

No specialized technical experience is required; training guidelines and project support are provided.

Skills

Online research, search evaluation, attention to detail, English comprehension, guideline compliance, web literacy, independent remote work.

Job Benefits

Paid sick time and Employee Assistance Program. Additional medical, dental, vision, HSA, life-insurance and 401(k) benefits may apply after eligibility requirements are met.

How To Apply

Apply through the official Welo Global careers page: [Search Quality Rater posting](#).
